

Solar-Log™ APP

The free Solar-Log™ APP allows you to always have your plant data with you. Current and past data is represented in the form of daily, monthly, annual and total overviews. Additionally, the CO2 savings from the plant, power consumption and self-consumption are displayed. Intuitive finger gestures enable you to quickly navigate between different time periods. The APP saves all of the data in an internal cache so that once loaded it can also display yields – even when no Internet connection is available.

Several different PV plants can be monitored by the Solar-Log™ and visualized with this APP.

Supported plants include any that are accessible via the Solar-Log™ WEB “Commercial Edition” and “Classic 2nd Edition” Internet websites.
