

Solar-Log™ WEB “Commercial Edition”

The “Full Service” option from the installer, portal operator and service provider: Installation, Monitoring, Maintenance.

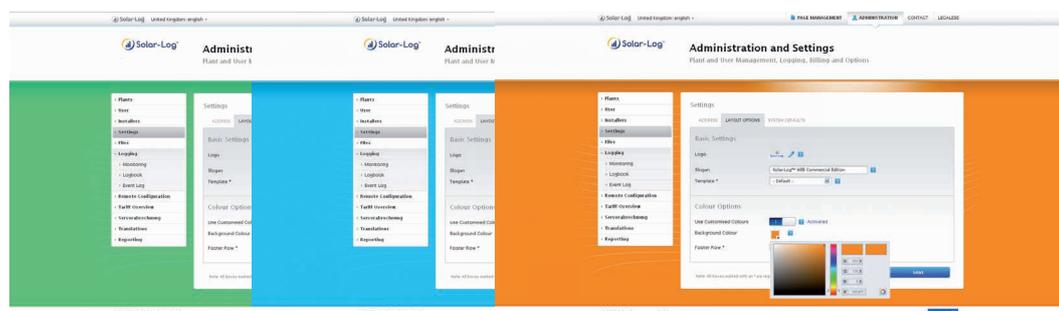

The Solar-Log™ WEB “Commercial Edition” has been developed for installers, portal operators and service providers. You can offer the plant owner a service contract to manage the PV plant remotely and to offer comprehensive professional monitoring. For the plant owner, this is the simplest and safest way since all of the installation and monitoring will be professionally and properly handled.

Professional remote maintenance

Without having to leave the office, the installer can react to error messages immediately by taking care of the problem remotely as well as access configuration settings. If needed, service calls can also be arranged immediately. At the same time, plant owners still have access to the yield and plant information.

Custom designed monitoring platform

The possibility to customize the design of your own platform is a huge service benefit for installers. A range of function modules are available that can be integrated as required at the touch of a button without expert knowledge. Pages individually designed with HTML can also be integrated. Precise color selection and HTML coding make it possible to customize the appearance to match the customer’s corporate design.

Solar-Log™ WEB “Commercial Edition” advantages and benefits

- 1 Professional maintenance**

The “Full-Service” maintenance concept offers plant operators ideal plant maintenance.
- 2 Effortless installation**

Use the Solar-Log™ Easy Installation to quickly and easily integrate plants into the Solar-Log™ WEB “Commercial Edition”.
- 3 Efficient monitoring**

Review the status of all monitored plants at a glance, ensuring quick and efficient monitoring.
- 4 Fast service restoration**

Detect, analyze and remedy errors quickly with the diagnostic tools, saving time and money.
- 5 Simple administration**

Manage and log all activities, events and appointments in the plant logbook.
- 6 Detailed reports**

Keep plant operators informed with reliable and easy-to-read reports. Reports can also be generated automatically with minimal effort.
- 7 Concise presentation**

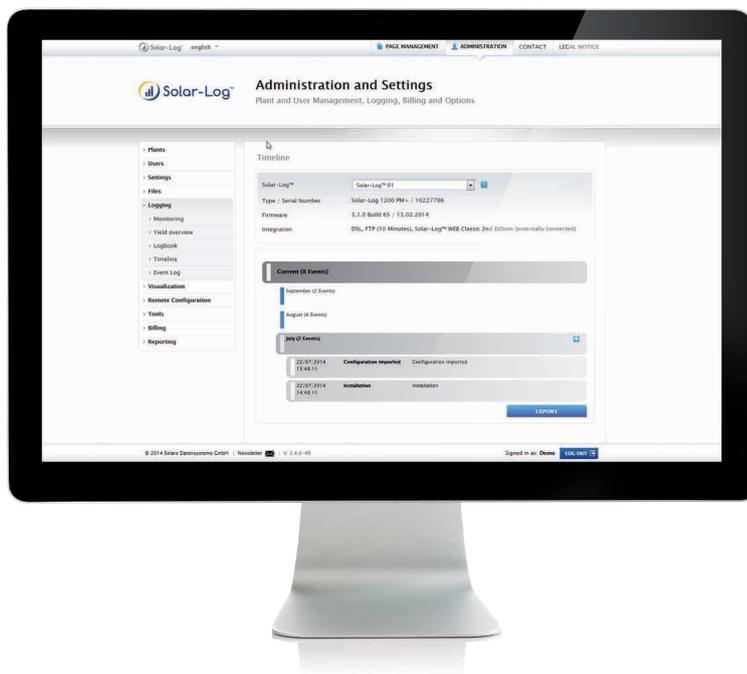

In connection with the WEB “Commercial Edition”, the Solar-Log™ APP, Solar-Log™ Dashboard and Solarfox® can access plant data and offer various options to present the data.
- 8 Protection against data loss**

Plant yields, error messages and configuration data are stored, secured and backed up on our server.

Power tools for installers, portal operators and service providers: Solar-Log™ WEB “Commercial Edition”

Simple integration of the PV plant and remote configuration

The set-up wizard guides you through the first steps to integrate the plants into Solar-Log™ WEB “Commercial Edition”. Once integrated, the Solar-Log™ settings can be conveniently accessed remotely via the Internet, greatly reducing the installation time and effort required on site.

Errors or breakdowns can be recognized and analysed in a very short time.

Always in the know with regular reports

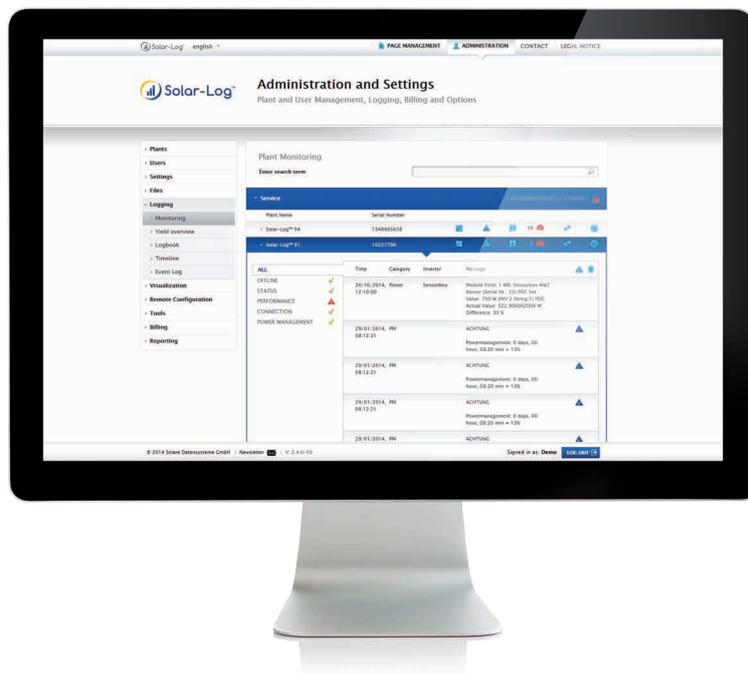

A well-arranged yield report for every plant that is monitored by Solar-Log™ WEB “Commercial Edition” is available in a PDF or CSV format. If desired, the reports can be automatically generated on a weekly, monthly or yearly basis and sent to as many e-mail addresses as you want, the ideal option for installers and their customers to be reliably informed on a regular basis.

Documents are available when you need them

Documents for specific plants such as string plans, contracts or specifications can be uploaded to the portal and are accessible at all times by authorized users.

Benefits for the plant operator

When quality of service plays a big role, the WEB “Commercial Edition” is the perfect solution with the convenience it offers to plant owners. No in-depth technical knowledge is required, there is no need to invest time in monitoring and managing the plant. However, when there is a malfunction, you are informed immediately and offered possible solutions.

The plant logbook includes the option of an integrated ticket system from which entries may be sorted according to their status. Service calls and tasks can be concisely managed and logged.

No basic fees, no long-term commitments

There are no annual basic fees to use the software, just a fee per plant. Every plant can be initially monitored for 30 days without obligation before plant specific charges arise. Hence, all Solar-Log™ fees can be correlated to the respective customers. On-site or online trainings are available to get the most out of all of the possibilities that the Solar-Log™ WEB “Commercial Edition” has to offer.
